# 1 Control Statements

## 1.1 Continue

```
[1]: s="String"
     for val in s :
         if val == "i":
             continue
         print(val)
     print("the end")
```

```
S
t
r
n
g
the end
```

## 1.2 Break

```
[2]: for val in s :
         if val == "i":
             break
         print(val)
     print("the end")
```

```
S
t
r
the end
```

## 1.3 Pass

```
[5]: #pass

     #The pass statement is a null operation

     s = "Hello"
```

```python
for val in s:
    if val == "o":
        pass
        print("pass block")
    print(val)
```

```
H
e
l
l
pass block
o
```

```python
[1]: for x in range(10):
    pass

if True :
    pass

def math():
    pass
```
